---

**BLACKBERRIES**  
1 gallon: $10

- **Navaho** Fruit are medium in size, excellent flavor and an average sugar content of 11-12%. Fruit ripen mid season. Fruit are also very firm, making storage and handling potential exceptional.

- **Ouachita** Fruit are medium to large in size, very good flavor and an average sugar content of 10-11%. Fruit ripen mid season over about five weeks with consistently high yields. One of the best varieties for storage and handling.

- **Triple Crown** Fruit are large with plants known for productivity and vigor. Plants disease resistant. Ripens late season.

- **Kiowa** Largest fruit on the market. Fruit ripen early to mid-season. One of the best home garden varieties available.

---

**MUSCADINES**  
1 gallon: $10

- **Tara** Bronze; fruit are large in size, good flavor; dry stem scar, and ripen early to mid season. Plants are initially slow growing but become more vigorous after the first growing season, disease resistant and cold hardy.

- **Triumph** Bronze; fruit are very large in size, good flavor; large clusters, good yields, dry stem scar, and ripen early. Plants have good vigor and disease resistance.

- **Magnolia** Bronze; fruit are medium in size, good winter hardiness and good flavor. A good choice for both juice and wine production.

- **Cowart** Black; fruit are medium in size, ripen early to mid season, have very large clusters, excellent flavor, good quality, and a wet stem scar. Plants are very vigorous and disease resistant.

- **Nesbitt** Black; fruit are very large in size, cluster; high yields, ripen mid to late season. Plants are vigorous, disease resistant, and cold hardy.
**Raspberries**
1 gallon: $10

**Fall Gold** Fruit are large in size, golden, non-crumbling, very sweet and somewhat soft. Plants are vigorous, productive and adaptable to a wide variety of soils. First crop ripens in July. Second crop ripens late August.

**Nova** Fruit are medium in size, dark red, and ripen early. Plants have average growth height and are fairly disease-resistant.

**Heritage** Fruit are large in size, dark red, and very sweet. Plants have vigorous growth habits and adapt well in well-drained soils.

---

**Blueberries**
1 gallon: $10 | 3 gallon: $18

**Powderblue** Ripens mid season. Berries are very light blue in color, medium in size with good firmness and flavor. *Suggested pollinators: Brightwell or Tifblue.*

**Tifblue** Ripens mid to late season. Fruit are medium size with good flavor. One of the oldest cultivars still planted, released in 1955 by UGA. *Suggested pollinators: Brightwell or Powderblue.*

**Brightwell** Fruit ripens in early to mid June through mid July. Berries have a medium size & excellent flavor. *Suggested pollinators: Powderblue or Premier.*

**Premier** Ripens early to mid season, usually earlier than other mid season varieties. Fruit are larger in size with excellent color & great flavor. *Suggested pollinator: Brightwell.*

**Titan** New variety with largest fruit (quarter size) of any other variety. Ripens mid-late season with firm, light blue berries. *Suggested pollinator: Powderblue.*

**Climax** Early fruiting variety. Berries are firm with excellent flavor, good color, and a very small stem scar. *Suggested pollinator: Premier.*

---

**Figs**
3 gallon: $18 | 7 Gallon: $25

**Celeste** Fruit are small to medium in size, light brown to violet-brown skin, whitish pink flesh, a closed eye and very few seeds. Plants produce in early summer. *(7 Gallon Available.)*

**Brown Turkey** Fruit are medium to large in size, copper color skin, amber to pink color flesh, great flavor, a closed eye and very few seeds. Plants are prolific, often producing fruit twice a year.

---

**Pomegranate**
1 gallon: $10 | 3 gallon: $20

**Wonderful** Produces large, tangy and flavorful purple-red fruit; perfect for eating fresh off the branch or to use in cooking.
**Apples**

*5 gallon: $24*

**Granny Smith** Fruit are large in size, light green skin, white flesh, crisp, juicy, and ripen late. Tree bears fruit at a young age and is a good pollinator.

**Red Delicious** Fruit are large in size with dark red skin, crisp, juicy and ripen mid-season. Trees produce high yields and are blight resistant.

**Yellow Delicious** Fruit are large in size with golden yellow skin, white flesh, crisp, good flavor and ripen mid to late season. Tree has good disease resistance, is very prolific and makes a good pollinator for other varieties.

**Arkansas Black** Fruit are medium in size with very dark red skin, yellow flesh, crisp, juicy, and ripen late. Recommended pollinator is Yellow Delicious.

**Fuji** Fruit are medium in size, yellowish green with red tint skin, white flesh, very crisp, juicy and ripen mid season.

**Gala** Fruit are medium to large in size, golden skin with red striping, white flesh, crisp, good flavor and ripen mid season.

**Plums**

*5 gallon: $24*

**Methley** Fruit are medium to large in size, reddish purple in color, sweet juicy flesh and ripen early. Trees are good pollinators.

**Santa Rosa** Fruit are large in size, purplish-red in color, yellow flesh and ripen midseason. Trees are partially self-fertile, but will produce better when planted with another variety.

**Peaches**

*5 gallon: $24*

**Bell of Georgia** Fruit are large in size, skin has a light color with a red cheek, excellent flavor, freestone, firm and ripen mid to late season.

**Elberta** Fruit are large in size, yellow with a red blush, yellow flesh, very juicy, freestone, good flavor and ripen late.

**Pears**

*5 gallon: $24*

**Orient** Excellent pear resistant to blight. White flesh and keeps well. Very large fruit produced in August. Does best with pollinator like Bartlett, Kieffer, or Moonglow.

**Moonglow** Vigorous tree with big, bold, blush fruit of good quality similar to Bartlett pears. Soft and juicy without being mushy. Tree resistant to blight. Best with pollinator like Bartlett or Orient.

**Pineapple** Large yellow fruit with red blush. Bears fruit at an early age and grows 15-20 feet tall. Flesh has pineapple flavor. Self-pollinating but bears more with second variety.
**BUNCH GRAPES**
1 gallon: $10

**Sunbelt** Fruit are large in size, small clusters, blue color, sweet, good flavor and ripens early to mid-season. Plants are very hardy and have vigorous growth habits. Similar to Concord but ripens more evenly, has better resistance to mildews and does better in warmer climates.

**Thompson Seedless** Fruit are medium in size, large clusters, pale green color, excellent sweet flavor and ripens mid season. Plants are very vigorous and productive. Thompson is one of the most common green table grapes.

**Niagara** Golden/white fruit with large clusters good for jams, jellies, and table grapes. Considered the white grape version of the Concord.
