

THINK ABOUT IT....

A JUMP START TO YOUR PORTFOLIO

THINK ABOUT IT~MAIN PROJECT....*Brainstorm the questions below concerning your main project. Your main project is the area you are studying and is more than your presentation. Be sure to look at your project objectives to get ideas for areas or topics in your main project.*

What have you done in your main project to be better at your project? This is project work. The skills you practice, the things you do to experience your project.

What books have you read, websites have you visited, tours you have taken, workshops or classes you've participated in, people you have talked with to learn more about your main project?

How have you taught other people about your main project? These are articles, stories or papers you've written, exhibits you've made, presentations you've given, classes you've taught or assisted with or service projects that are related to your main project?
