Wilcox County

A new option for fusarium wilt management in Georgia watermelon production is grafting with Carolina Strongback rootstock. However, grafted plants have a significantly higher cost when compared to nongrafted plants. Therefore, the Wilcox County agent assessed lower grafted-plant population rates for potential cost reduction while maintaining acceptable yields. Overall, results from the trial indicated that at a 15% and 30% reduction in plants per acre, acceptable yields were maintained when compared to standard plant populations. These data indicate that a Georgia producer could utilize grafted plants at a lower plant-population rate to offset input costs and potentially maintain yields comparable to nongrafted plants at a standard plant population rate.

2025 Georgia Ag Impact Report
UGA Center for Agribusiness and Economic Development

A healthy Georgia is a better Georgia.

University of Georgia Cooperative Extension offers programming focused on mental health, financial well-being, nutrition and everything in between. UGA Extension had 1,756,355 face-to-face contacts in 2024. Of these, 200,067 contacts addressed health and wellness topics, including rural and farm stress.

Extension is committed to helping rural Georgia farmers and families thrive. UGA Extension provides physical and mental health resources to keep rural Georgia growing stronger, especially when times are tough. Our new Behavioral Health Team provides fact sheets, trainings and a weekly blog—all to help Georgia individuals and families thrive.

Growing cities.

UGA Extension helps urban gardeners develop school gardens, community gardens and urban farms to benefit their communities. Extension works with educators to create sustainable outdoor classrooms that function as successful teaching tools. Community gardeners are supported in growing healthy food crops in small spaces while urban farmers are encouraged to apply the latest agricultural research to grow their businesses.

Committed to Georgia's youth.

Georgia's 4-H enrolled 193,518 youths across the state during the 2023-24 school year.

Get the facts.

UGA Extension publications are the go-to source for unbiased, research-based information in the state of Georgia.
