

4-H Robotics Club

Are you interested in engineering? building? coding? robotics? Then you are in luck! We have a 4-H club all about robotics!

This is **NOT** the **competition TEAM**, but a monthly **4-H club** meeting where you will learn the basics of the engineering design process with the new VEX GO hands-on activities (grades 3-5: <https://education.vex.com/stemlabs/go>; grades 6-8: <https://education.vex.com/stemlabs/iq>)

This is for those in **3rd-8th grade**. Members can be in public, private and home school.

There are a LIMITED number of spots for this club due to equipment used. To receive an application for the 4-H robotics club please contact the 4-H office at 706-638-2548 or e-mail walker.extension@uga.edu.
